PassePartout Persia

Our firm has been offering since 1991 handmade wooden picture frames and passepartout to photographers, painters and collectors of old prints. We concentrated on making and promoting novel and innovative objects in response to the varied requirements of our customers. We have long cooperated with *Incontri Internazionali d'Arte* on several important exhibitions and in 2008 we provided frames and passepartout for the *Venice Biennale di Architettura*.

In 2014 Valentina Persia, following in her parents' footsteps, proceeded to renovate the firm and founded P. P. Her long-standing love of art had led her to pursue her studies at the "*Via di Ripetta*" secondary art School and later in the Tuscia University Course in *Preservation of Cultural Heritage*.

Today P. P. has widened the range of its products to include laser-cut metal frames, high quality materials suitable for long-term preservation, and the loan of picture frames in large numbers and different types for exhibitions and events throughout Italy.

Our customers include: *Ministero dei Beni ed Attività Culturali, Fondazione Italo Israeliana for culture and arts, the Italian Cultural Institute in London*, other Foundations, Museums, and world-renowned artists.
